

# UiPath Solution Packages

Our tailored UiPath packages are designed to meet diverse business needs, ensuring seamless automation implementation that aligns with your organisation's goals. Whether you're starting your automation journey, scaling up existing processes, or seeking enterprise-wide transformation, our packages cater to your specific requirements.

## WHY CHOOSE US

### Expert Guidance

Benefit from the expertise of seasoned professionals who can tailor automation solutions to your specific needs, ensuring optimal implementation and performance.

### Cost Efficiency

Save on long-term costs by reducing errors, improving process efficiency, and minimising the need for extensive in-house training and development.

### Scalability

Receive scalable solutions designed to grow with your business, allowing you to adapt quickly to changing demands and expand your automation capabilities as needed.

### Innovative Solutions

Access the latest technologies and best practices in automation and AI, ensuring your processes remain cutting-edge and competitive in the market.

## PACKAGES

### Consulting Packages

Tailored automation solutions designed to meet your specific business needs, with tiered pricing to suit every budget.

### Intelligent Document Processing Packages

Enhance efficiency with our Intelligent Document Processing package, offering scalable automation levels to streamline document handling.

### Test Suite Packages

Ensure robust and reliable automation with our Test Suite package, providing comprehensive testing services at tiered prices for every client requirement.

# Consulting Packages

## **Starter** 2 Small Automation Processes

\$10,000 USD

### Capabilities Included:

- Copy and paste field to field
- Native environment: Automate data entry or transfer within an application's native interface using standard copy and paste actions.

### Additional Features:

- Initial consultation and assessment
- Implementation of foundational automation
- Basic training

## **Scaler** 3 Small and 2 Medium Automation Processes

\$25,000 USD

### Capabilities Included:

- Copy and paste field to field and native environment
- Applying simple business rules to decide on which fields or actions to take: Implement basic decision-making logic to automate processes based on predefined rules.

### Additional Features:

- Comprehensive automation assessment
- Scalable automation solutions
- Advanced training

## **Enterprise** 3 Small, 2 Medium and 2 Large Automation Processes \$50,000 USD

### Capabilities Included:

- Copy and paste field to field and native environment
- Applying simple business rules to decide on which fields or actions to take
- Applying some complex or large amounts of business rules with exceptions
- Screenshots: Capture screenshots as part of automation workflows for auditing, error handling, or reporting purposes.
- Building Reports: Automate the generation of reports using data collected from automated processes.
- High-quality unscanned PDF reading: Utilise OCR capabilities to extract and process data from unscanned PDF documents.

### Additional Features:

- Enterprise-wide automation strategy
- Complex automation solutions
- Customised training programs

# Intelligent Document Processing Packages

## Automate Remittance Processing

\$15,000 USD

Streamline remittance processing by leveraging UiPath Document Understanding to automatically extract, interpret, and integrate remittance information into your financial systems.

### Key Benefits:

#### Enhance Accuracy

Minimise manual errors with precise data extraction from various remittance formats.

#### Improved Cash Flow

Speed up reconciliation processes, ensuring timely updates to accounts receivable.

#### Scalability

Effortlessly handle peak volumes without additional staffing requirements.

### Features:

- Customisable data extraction models tailored to specific remittance document layouts.
- Seamless integration with ERP and accounting software.
- Advanced analytics for tracking processing efficiency and accuracy.

## Tranform Invoice Processing

\$15,000 USD

Automate the entire invoice processing lifecycle, from extraction to payment, using UiPath Document Understanding. Transform your accounts payable with unparalleled efficiency and accuracy.

### Key Benefits:

#### Cost Reduction

Significantly lower processing costs by reducing manual intervention.

#### Faster Processing Time

Achieve rapid invoice processing, enhancing supplier relationships.

#### Compliance and Control

Ensure adherence to policies and easy auditability through automated workflows.

### Features:

- AI-powered extraction of invoice data, including line items and complex fields.
- Validation against purchase orders and receipt confirmation.
- Integration with payment systems for automated processing.

# Intelligent Document Processing Packages

## Secure and Efficient ID Verification

\$9,000 USD

Utilise UiPath Document Understanding for fast, accurate, and secure verification of IDs for KYC, employee onboarding, and more. Enhance security and compliance while providing a seamless user experience.

### Key Benefits:

#### Enhanced Security

Reduce fraud risk through precise ID verification and validation.

#### Streamlined Onboarding

Accelerate customer and employee onboarding processes.

#### Regulatory Compliance

Ensure compliance with KYC and anti-money laundering (AML) regulations.

### Features:

- Extraction and validation of data from various ID forms, including passports, driver's licenses, and national ID cards.
- Integration with background check and compliance databases.
- Customisable workflow to suit regulatory and business requirements.

## Streamline Work Order Management

\$9,000 USD

Optimise the management of work orders by automating data extraction, categorisation, and routing with UiPath Document Understanding. Improve operational efficiency, reduce turnaround times, and enhance service quality.

### Key Benefits:

#### Operational Efficiency

Automate the extraction and processing of work order information, reducing manual data entry and processing times.

#### Improved Accuracy

Ensure accurate data capture and reduce errors in work order management.

#### Enhanced Service Delivery

Quicker processing and routing of work orders lead to improved response times and customer satisfaction.

### Features:

- AI-based extraction of information from structured and unstructured work order formats.
- Automatic categorisation and routing of work orders based on extracted data.
- Integration with service management and scheduling systems for efficient dispatch and tracking.

# Test Suite Packages

## Essential Testing Package

\$10,000 USD

Implementation of up to **5** basic test automations, focusing on critical business processes or applications.

### Includes:

#### Consultation

Initial consultation to identify key areas for testing automation, aiming to enhance testing efficiency and reduce manual effort.

#### Set Up

Initial setup and configuration of the UiPath Test Suite on client infrastructure, including basic integration with existing tools and systems.

#### Training

Basic training for staff on managing and executing automated tests using UiPath Test Suite.

## Advanced Testing Package

\$25,000 USD

Implementation of up to **9** test automations, including **more complex and integrated test cases** across applications and systems

### Includes:

#### Consultation

Comprehensive consultation services, including test strategy optimisation, advanced test case design, and automation roadmap planning.

#### Set Up

Initial setup and configuration of the UiPath Test Suite on client infrastructure, including basic integration with existing tools and systems.

#### Training

Advanced training sessions covering best practices, test data management, and advanced UiPath Test Suite features.

# Test Suite Packages

## Enterprise Testing Package

\$50,000 USD

Implementation of up to **14** test automations for a wide range of **complex testing scenarios, including end-to-end processes.**

### Includes:

#### Consultation

In-depth consultation services including enterprise-wide test automation strategy, continuous testing integration, and test environment management.

#### Set Up

Initial setup and configuration of the UiPath Test Suite on client infrastructure, including basic integration with existing tools and systems.

#### Training

Customised comprehensive training programs for different roles within the organisation, from test engineers to project managers, focusing on scalability and continuous improvement in testing practices.

## Compare Packages

Package	Essentials	Advanced	Enterprise
Cost	\$10,000 USD	\$25,000 USD	\$50,000 USD
No. Test Automations	5	9	14
Consultation	Identify key areas	Strategy optimisation, advanced test case design, and automation roadmap planning.	Enterprise-wide test automation strategy, continuous testing integration, and test environment management.
Training	Basic training for staff	Cover best practices, test data management, and advanced UiPath Test Suite features.	Customised training program for separate roles in organisation
